ASSEMBLY INSTRUCTION

2QETL

TEMPERATURE CONTROL VALVE WITH BUILT-IN STOPS AND TWO WAY DIVERTER WITH SHUT-OFF

2QETL

REMOVAL OF FIXTURE:

Always turn the water supply off before removing the existing fixture or disassembling a valve. Open all fixture handles to relieve water pressure and to ensure that the water has been successfully turned off.

CARE OF FIXTURE:

The use of warm water and a soft cloth is all that is required to clean Rubinet products. The patina of our living finishes (Oil Rubbed Bronze & Tuscan Brass) will change as a result of normal use. Applying Mineral Oil on occasion will create a softer look, subtle color changes and character.

5

Install the handle with the safety stop
override button is at the 12 o'clock position.

4

Before installing the Handle make sure that the red marks on the valve stem and safety stop ring are at 12 o'clock position as shown above. It corresponds to approximately 100 F (38 C) temperature of the discharging water.

If the temperature varies from the specified, adjust valve stem to reach approximately 100° F (38° C).

1

Check both Service Stops are open using a 3/16" flat screwdriver and turning the stems counter clockwise until they stop.

2

3

Turn cartridge spline into OFF (at 12 o'clock) position before installing handles.
