

FSC1018CLA

Classic Tub Spout with Diverter

artos®

OPERATING SPECIFICATIONS

OPERATING PRESSURE

Minimum: 15 psi

Maximum: 125 psi

Above 90psi it may be necessary to install a pressure reducer

OPERATING TEMPERATURE

Maximum: 176°

FLOW CAPACITY

6.3GPM

STANDARDS

ASSE 1016-2011 | ASME_A112.1016-2011 |

CSA B125:16-11

NOTES FOR INSTALLATION

For proper operation of the diverter tub spout, ½" copper pipe must be used between the valve and the tub spout. The use of PEX or other flexible tubing in this section is not permitted, as it may result in insufficient backpressure release, causing water to divert to the showerhead even when the diverter is not engaged.
